

## Author Index to Volume 21

- Allen, G. C., 187
- Bertrand, G., 1
- Cabane, J., 21
- Chaix, A. M., 1
- Chaze, A. M., 205
- Coddet, C., 205
- Combe, A., 21
- Dovi, V., 309
- Erhart, Helmut, 81
- Fioravanti, K. J., 285
- Fransen, T., 271
- Gellings, P. J., 271
- Gesmundo, F., 309
- Hafian, B., 119
- Hou, P. Y., 171
- Jackson, P. R. S., 135
- Jarraya, K., 1
- Kofstad, P., 119, 233
- Langevoort, J. C., 271
- Larpin, J. P., 299
- Lillerud, K. P., 119, 233
- Mallia, L. V., 103
- Narita, T., 39, 57
- Perez, M., 299
- Pickering, H. W., 285
- Rapp, R. A., 71, 81, 89
- Raynaud, G. M., 89
- Smeltzer, W. W., 39, 57
- Straszheim, Mark J., 71
- Tempest, P. A., 187
- Tyler, J. W., 187
- Viani, F., 309
- Wallwork, G. R., 135
- Wang, Rosie, 71, 81
- Whittle, D. P., 171
- Wild, R. K., 187

# Subject Index to Volume 21

Austenitic stainless steel, effect of cold work on oxidation, 271	Iron-Mn-Al alloys, high-temperature oxidation, 135
Binary alloys, solid-solution oxide growth, 171	Manganese, sulfidation in sulfur vapor, 299 Morphology, oxide scales on titanium, 1
Chemical diffusion, evaluation of from relaxation data, 309	Nickel, reaction mechanism in $\text{SO}_2 + \text{O}_2/\text{SO}_3$ , 119
Chromium, effect of on titanium oxidation, 205	Nickel, sulfate-induced hot corrosion, 233
$\text{CO}_2$ , oxidation behavior of stainless steel, 187	Oxidation-resistant alloy, Fe-Mn-Al-Si, 71
Cold work, effect on oxidation of stainless steel, 271	Parabolic growth, solid-solution oxides, 171
Diffusion, chemical, evaluation of, 309	Pits, formation of observed <i>in-situ</i> , 89
Duplex steels, sulfidation behavior, 103	Pyramids, formation of observed <i>in-situ</i> , 89
Fe-Mn-Al-Si Alloy, high-temperature oxidation, 71	Relaxation data, use of to determine chemical diffusion, 309
Fe-Mn-Al-Si Alloy, <i>in-situ</i> SEM study, 81	SEM, <i>in-situ</i> observation during high-temperature oxidation, 89
Galvalume-coated steel, oxidation in $\text{O}_2$ and $\text{O}_2/\text{H}_2\text{O}$ , 285	SEM, <i>in-situ</i> study of Fe-Mn-Al-Si alloy during oxidation, 81
Hot corrosion, sulfate-induced, Ni, 233	Silver alloys, internal oxidation mechanism, 21
Internal oxidation, mechanism of in silver-alloys, 21	Solid-solution oxides, parabolic growth on binary alloys, 171
	$\text{SO}_2 + \text{O}_2/\text{SO}_3$ , reaction mechanism with Ni, 119
	Stabilized stainless steel oxidation behavior, 187

- Stainless steel, effect of cold work on oxidation, 271
- Stainless steel, stabilized, oxidation behavior, 187
- Sulfate-induced hot corrosion, Ni, 233
- Sulfidation, of austenitic-ferritic steels, 103
- Sulfidation, of Fe-26.6 Cr, 39
- Sulfidation, mechanism, Fe-26.6 Cr, 57
- Sulfidation, Mn in sulfur vapor, 299
- Titanium, influence of chromium on oxidation, 205
- Titanium, oxide scale morphology, 1
- Whiskers, formation of observed *in-situ*, 89

# WINNING THE GAMES SCIENTISTS PLAY

Carl J. Sindermann

"Sindermann's advice is: whatever the game is, play it as a professional. This is good advice . . ."

—Sir Peter Medawar, *New Scientist*

"As a guide to social and professional advancement in such company, the book is, so far as I can judge, excellent. . . . Anxious novices will no longer have to discover the hard way where to go for financial sponsorship, how to cope with recalcitrant and temperamental foreigners and what to watch out for in drawing up an agreement with a commercial conference organizing company. Dr. Sindermann writes here with an authority that can only stem from long experience and careful study."

—Walter Gratzer, *Nature*

"A clearly written, often humorous book . . . Provides a light-hearted but sage viewpoint about what affects the careers of scientists and how they can make the most progress. . . . The author, a scientist and laboratory director, clearly knows his topic and the result is a book both useful and amusing."

—Library Journal

Written for both the professional and the aspiring scientist, physician, psychotherapist, researcher, or engineer, this book offers strategies that will be useful for attaining prominence and success. It covers how to get on the fast track, how to get and use power, how to overcome bureaucracy, and much more.

304 pp., 1982

## Instructions to Contributors

1. Manuscripts should be sent to:  
Prof. D. L. Douglass  
Materials Department  
Room 6531, Boelter Hall  
University of California at Los Angeles  
Los Angeles, California 90024
2. Submission is a representation that the manuscript has not been published previously and is not currently under consideration for publication elsewhere. A statement transferring copyright from the authors (or their employers, if they hold the copyright) to Plenum Publishing Corporation will be required before the manuscript can be accepted for publication. The Editor will supply the necessary forms for this transfer. Such a written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the new U.S. Copyright Law in order for the publisher to carry through the dissemination of research results and reviews as widely and effectively as possible.
3. Type double-spaced, and submit the original and two copies (including, where possible, copies of all illustrations and tables).
4. An abstract of 150 words or less is to be provided.
5. A list of 4–5 key words is to be provided directly below the abstract. Key words should express the precise content of the manuscript, as they are used for indexing purposes, both internal and external.
6. Illustrations (photographs, drawings, diagrams, and charts) are to be numbered in one consecutive series of Arabic numerals. The captions for illustrations should be typed on a separate sheet of paper. Photographs should be large, glossy prints, showing high contrast. Drawings should be prepared with india ink. Either the original drawings or good-quality photographic prints are acceptable. Identify figures on the back with author's name and number of the illustration.
7. Tables should be numbered and referred to by number in the text. Each table should be typed on a separate sheet of paper.
8. References should be made by using superscript Arabic numerals, and the full references should be given in a list at the end of the paper. For maximum clarity, abbreviations should be avoided in the references. Whenever a book is cited, the number of the relevant chapter should be given.
9. In general, *Oxidation of Metals* follows the recommendations of the American Institute of Physics in their *Style Manual*, and it is suggested that contributors refer to this publication.
10. **The journal makes no page charges.** Reprints are available to authors, and order forms are sent with proofs.

## OXIDATION OF METALS

Vol. 21, Nos. 5/6

June 1984

---

### CONTENTS

Sulfate-Induced Hot Corrosion of Nickel <i>Karl Petter Lillerud and Per Kofstad</i>	233
On the Influence of Cold Work on the Oxidation Behavior of Some Austenitic Stainless Steels: High Temperature Oxidation <i>J. C. Langevoort, T. Fransen, and P. J. Gellings</i>	271
Behavior of Galvalume Coated Sheet Steel at Elevated Temperatures in O <sub>2</sub> and O <sub>2</sub> /H <sub>2</sub> O Atmospheres <i>K. J. Fioravanti and H. W. Pickering</i>	285
Sulfidation of Manganese in Sulfur Vapor at Low Pressure and Temperatures Between 873 and 1273 K <i>M. Perez and J. P. Larpin</i>	299
A Method of Analysis of the Relaxation Data for Evaluation of the Chemical Diffusion Coefficient in the Case of Partial Rate Control by Surface Reaction <i>F. Viani, V. Dovì, and F. Gesmundo</i>	309
Author Index to Volume 21	329
Subject Index to Volume 21	331
